

# COLLECTION POINT OLIVIA<sup>®500</sup>free

CONTAINER FOR SEPARATE COLLECTION OF USED VEGETABLE OIL EQUIPPED WITH PALLET-FORK SHAPED BASE

Olivia 500 roll bar

Cod.OV-60.100C (ex cod.02512/V)

500L

It is made of two containers, one embedded into the other. The outer container (upper diameter 125 cm. Lower diameter 105 cm height 125 cm roughly) has a capacity of 800 litres and works as a containment tank. It was designed to be easily released through a transpallet when empty and transported through a fork lif once full.

It's realized in high density polyethylene suitable and resistant against the aggression of atmospheric agents and oils, printed with rotational system that increases the impact resistance (as such molding it allows the absence of welds), it's provided for additional safety roll bar and or poles for ground fixing with appropriate bolts (plugs and screws not included), to avoid shocks and / or accidental rollovers also due to atmospheric events of high intensity.

Olivia<sup>®</sup> can be easily positioned and transported because it was designed in a way that makes it easy to handle it, even if full, in case of need (oil freezing, extraordinary or ordinary maintenance).

As a matter of fact it has special sockets to transport it easily with a standard transpallet.

It can be easily checked and cleaned thanks to an upper cover (diameter 125 cm.) with a trip-lever closure and coded key lock.

The inner container, made of pehd moulded through a rotational system, has a capacity of 495 litres and it is equipped of a large filling neck with a screw cap for oil collection.

It has a float-type gauge with external analogical display, like a manometer, a manually opened cover with automatic closure with air breather and anti-odour carbon filter (lasting about 2 years) which keeps stray animals away, a blocking device, a funnel for easy oil disposal and a descent control valve on the outlet side in case of accidental upending or overfilling.

Available in the Olivia free version:

OLIVIA 500 FREE cod. OV-60.100C – To be placed along roads and/or in strategic areas as a support to ecological islands, equipped with an integral roll bar that can be fixed to the ground through special plates (plates not included) so that it can resist to possible strong weather events or accidental shocks that could overturn it, and a yellow identification sign (100 x 40 cm.) with green inscriptions.

Optional:

Customized stickers, Oil Only 500 anti-slip footboard.
