Optional wall fixing plate

Identification sign

The presence on three sides of anti-slip stickers make it secure

PATENTED

*H-Oli container except

The OIL ONLY 120 non-slip grid platform is designed to increase user safety for access when filling the H-OLI Collection bunker with used vegetable oil from domestic containers, such as the OLI and ECOHOUSE containers. The platform is manufactured from pre-galvanized sheet steel, with accessories in hot-dip galvanized steel to provide excellent weather resistance and it includes holes for anchoring the platform to the ground. In the event of any accidental oil spillage, the grid together with three non-slip ramps, guarantees safe pedestrian access to users.

The platform has special high oil absorbent yet water-repellent pads for rainwater diversion from holes in the bottom of the tray, in order to avoid water stagnation and unpleasant odours and insect infestation.

*The absorbent capacity of the pads is about 1.2 litres each, for a total of 12 litres per platform.

Replacement of the pads should be carried out in the event of any major spillage (max. approx. 10-12 litres) and used pads must be disposed of according to environmental regulations in force.
